

Lucians True History (Classic Reprint)

It is a commonplace of criticism that Lucian was the first of the moderns, but in truth he is near to our time because of all the ancients he is nearest to his own. With Petronius he shared the discovery that there is material for literature in the debased and various life of every day that to the seeing eye the individual is more wonderful in colour and complexity than the severely simple abstraction of the poets. He replaced the tradition, respected of his fathers, by an observation more vivid and less pedantic than the note-book of the naturalist.
